THIS IS UNEVALUATED INFORMATION

Protsessy i apparaty v neftepererabatyvayushchey promyshlennosti, State Scientific and Technical Publishers of Petroleum and Mineral Fuel Literature. 1949.

The book, "Processes and Equipment in the Oil-Processing Industry," was issued by the Administration of Educational Institutions of the Ministry of the Petroleum Industry as a textbook for petroleum-engineering courses.

The book contains a description of the processes of the oil-processing industry, the fundamental design of equipment, and methods for technological calculation of petroleum plant equipment.

<u>TABLE OF CONTENTS</u>	<u>Page</u>
Foreword	3
I. Units of Measurement	5
II. Basic Physicochemical Properties of Hydrocarbons and Their Mixtures	9
Specific Gravity	9
Molecular Weight and Average Boiling Point	10
Characterization Factor	12
Viscosity	14
Vapor Tension	15
Critical Constants	15

	<u>Page</u>
Reduced Temperatures and Pressure	16
Specific Heat Capacity, Latent Heat of Evaporation and Melting, Specific Heat Content	17
Heat Conductivity of Petroleum Products	23
Heat of Reaction	23
Efficiency of Fuel	25
III. Fundamentals of Heat Transfer	27
Heat Transfer by Conduction	27
Heat Transfer by Convection	31
Heat Transfer Through a Plane Single-Layer Wall	37
Heat Transfer Through a Cylindrical Wall	40
Resistance of Impurities	41
Mean Temperature Difference	41
Heat Transfer by Radiation	49
Radiation and Absorption Radiation by Solids	50
IV. Heating With Flames	54
General	54
Basic Types of Flame Heaters	58
Process of Fuel Combustion	68
Heat Balance	75
Thermal Calculation for a Pipe Still	76
Hydraulic Calculation for a Pipe Still	86
Gas Resistance and Draft	87
V. Flameless Heating, Condensation, Cooling	97
Heaters (Heat Exchangers)	97
Condensers and Coolers	99
Cooling to Low Temperatures	105
VI. Fundamentals of Distillation and Fractionation	109
Fundamental Laws	109
Equilibrium Systems	117
Single-Stage Evaporation of Complex Mixtures	126

	<u>Page</u>
Distillation of Immiscible Liquids	130
Fundamentals of Fractionation	132
Material Balance of a Column	134
Heat Balance of a Column	139
Determination of the Number of Theoretical Plates in a Column	140
Fractionation in Compound Columns	142
Determination of the Temperature System in a Column	143
Classification and Construction of Distillation Columns	144
Calculation of the Basic Dimensions of Distillation Columns	146
VII. Processing of Liquids	157
Mixing	157
Settling	162
Filtration	169
Calculation of Filtration	176
Centrifuging	179
Calculation of Centrifuges	183
VIII. Processing of Gases	187
Gas Purification	187
Absorption	189
Desorption	195
IX. Adsorption	197
Basic Concepts	197
Construction and Calculation of the Adsorber	200
X. Other Processes	201
Crushing and Sorting of Dry Materials	201
Transportation of Solid Materials	205
Extraction	207
Drying of Solid Materials	211
Reaction Equipment	215
Bibliography	233
